The assignment emphasizes understanding the assumptions, strengths, and limitations of each method, encouraging critical appraisal.

Market Failures and Externalities

Environmental issues are often characterized by market failures?situations where markets do not allocate resources efficiently. Externalities, both positive and negative, are central to this discussion.

- Negative Externalities: Pollution from factories affecting public health and ecosystems.
- Positive Externalities: Benefits of conservation efforts like reforestation or wetland preservation.

The assignment discusses how these externalities necessitate intervention through government policies or market-based instruments to correct inefficiencies.

Policy Instruments for Environmental Management

The assignment explores various mechanisms to address environmental externalities:

- Command-and-Control Regulations: Direct restrictions such as emission standards.
- Economic Instruments: Taxes (e.g., carbon tax), subsidies, tradable permits (e.g., cap-and-trade systems).
- Market-Based Approaches: Creating incentives for pollution reduction, encouraging innovation, and sustainable practices.

Analyzing case studies, the assignment illustrates the effectiveness and challenges associated with each instrument.

Sustainable Development and Resource Management
