 - The probability of any event is between 0 and 1.
 - The probability of the entire sample space is 1.
 - For mutually exclusive events, the probability that one or the other occurs is the sum of their individual probabilities.

What is Statistics?

Statistics involves the collection, analysis, interpretation, presentation, and organization of data. It helps in making informed decisions when faced with variability and uncertainty.

Main components of statistics:

- Descriptive Statistics: Summarizing data using measures like mean, median, mode, and standard deviation.
